TRANSMITTAL OF CORRECTED AND FORMAL DRAWING

Dear Sir:

Enclosed are corrections to the drawings shown in red ink.

In Figure 2, the indicator line for numeral 31 has been shortened and an arrow added to indicate the entry portion or louver; indicator line for numeral 36 has been shortened to indicate the trailing edge of the louver; and additional curved lines have been added to better show the concave depressions of the louver.

In Figure 13, phantom lines have been added to the drawing to show the air flow passage

(bore) can be drilled normal to the axis of the flange or drilled at an angle.

In Figure 14, the indicator line for numeral 31 has been shortened and an arrow added to indicate the entry portion or louver; indicator line for numeral 36 has been shortened to indicate the trailing edge of the louver; and additional curved lines have been added to better show the concave depressions of the louver.

Also enclosed are substitute formal drawing pages for Figures 1, 2, 13, and 14, including the corrections. All of the corrections conform to the original specification, drawings, and claims and no new matter has been added to the specification.

Counsel would appreciate a telephone call from the Patent Office promptly if there are any problems with the drawings.

Respectfully submitted,

David W. Carrithers
